-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Drawings***

The drawings are objected to because in Figure 1, the numeral "9" is missing its lead line. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3654

Claims 1 and 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohn (German Patent No. DE 195 05 277) in view of Yang (U.S. Patent No. 4,349,123).

With respect to Claims 1 and 5-7, Kohn, Figures 1-8, teaches a device having a winding-up roller 10 a drive for the winding-up roller, a roll which is arranged on the winding-up roller and comprises at least one film web and stacks of bags arranged thereon,; the web is guided over a deflecting roller. Yang, Figures 1-7, teaches the openings of the bags are arranged at the front, as seen in the unwinding direction. It would have been obvious to one of ordinary skill in the art to provide the openings at the front, as taught by Yang, for the purpose of making it easier on the user to find the opening of the bag.

With respect to Claim 8-9, the method described in these claims would inherently result from the use of the device of Kohn in view of Yang as advanced above.

Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohn in view of Yang as applied to claims 1 and 5-9 above, and further in view of Honegger (U.S. Patent No. 4,688,368).

With respect to Claims 2-3, Kohn is advanced above. Honegger, Figures 1-5, teaches an imbrication is formed such that the leading edges of the bags are located beneath the respectively preceding bag stack. It would have been obvious to one of ordinary skill in the art to form the bag roll, as taught by Honegger, because one of ordinary skill would have been expected to have routinely experimented to determine the optimum dimensions for a particular use.

Response to Arguments

Applicant's arguments with respect to claims 1-3 and 5-9 have been considered but are moot in view of the new ground(s) of rejection.

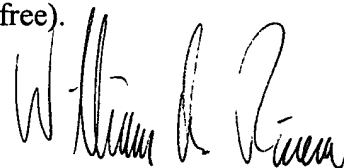

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William A. Rivera whose telephone number is 571-272-6953.
